

A scatter plot showing the relationship between the number of individuals (N) on the x-axis and the number of species (S) on the y-axis. The x-axis ranges from 0.0 to 0.5, and the y-axis ranges from 0 to 10. The data points are blue dots. The plot shows a general trend where the number of species increases with the number of individuals, with some outliers at higher N values.
